

Belzona Training Seminar

You are invited to the Belzona SuperWrap II Training

ENVIRONMENTAL TECHNOLOGY

Latest innovations in coatings and composites to enhance your design and maintenance strategy

Training Facilitator: Andre Bekker – Belzona SuperWrap II Approved

What to Expect:

This course provides the experienced applicator with the specific theoretical knowledge and practical skills required to effectively apply a Belzona compliant composite pipe repair system. Qualified in accordance with the ISO 24817 and ASME PPC 2 standards, trainees will complete pre-requisite modules before completing repairs at a Belzona Training Centre.

Duration & Content:

2 Days

International standards

Material application techniques

Practical validation exam

Why Attend:

Correct application is key to reliable product performance; each course is designed to ensure that the risks of an application failure, due to incorrect application practices, are reduced to an absolute minimum. Not only do our courses allow you to enhance your application skills, but they will provide the technical and practical knowledge required to adapt to ever-
